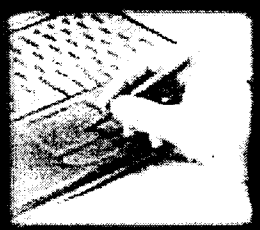
- **Programmable Power Key— Unattended e-mail retrieval**

VAIO

Incredibly innovative, incredibly convenient.



Pen Based Signature and Drawing Capture

If a picture is worth a thousand words, this feature will save you a lot of typing. Use the stylus pen to draw a map or write your signature on the pad. Then add these images to your documents.

Programmable Power Key (PPK)

Using the Programmable Power Key (PPK) button, collect your e-mail automatically with one key stroke. You can also program your PPK to turn on your SuperSlim Notebook at a predetermined time and perform simple tasks—completely unattended.

i.LINK™ (IEEE-1394)

This interface lets you download high-quality still images at high speeds directly from digital video (DV) camcorders such as the Sony Digital Handycam®. You can then use these digital video images to add a new visual dimension to your documents. Or e-mail family pictures to loved ones.
